Use existing bots: @Fx4Usms_bot

Step 1: Create a group between you and @Fx4Usms_bot or add @Fx4Usms_bot to the group you want to send messages to

Step 2: Set admin rights for @Fx4Usms_bot in this group

Step 3: Copy token: [5875396528:AAEMMICH6FsA5gMTXAZppXzYWKxkFK7q8WM](#) to Fx4U's bots

Get Telegram's Group ID

Step 1: Log in to Telegram on <https://web.telegram.org> (using Chrome, Firefox, etc.)

Step 2: Click on the group you want to get ID and Look up the address bar you will see form: <https://web.telegram.org/z/#-xxxxxxxxxx>

Step 3: Copy this Group ID “-xxxxxxxxxx” to Fx4U's bots

Create a New Bot for Telegram if you want to use your own bot

Step 1: Enter @Botfather in the search tab and choose this bot.

Step 2: Choose or type the /newbot command and send it.

Step 3: Choose a name for your bot — your subscribers will see it in the conversation. And choose a username for your bot — the bot can be found by its username in searches. The username must be unique and end with the word “bot.”

After you choose a suitable name for your bot — the bot is created. You will receive a message with a link to your bot t.me/<bot_username>, recommendations to set up a profile picture, description, and a list of commands to manage your new bot.

How to Find a Token for an Existing Bot

Step 1: Go to the @BotFather bot and send the command /token.

Step 2: Choose the bot you need to get the token

Step 3: Copy the token value to Fx4U's bots
